Delivering Excellence, Value and Innovation

www.bcagroup.co.uk

Welcome to BCA Group

Over 40 Years in Manufacturing

Founded in 1981, the company specialises in manufacturing electrical systems and electronics for the leisure and automotive industries.

BCA Motion provides bespoke electrical kits for professional campervan converters, including wiring harnesses, control panels, power distribution, consumer units, chargers, sockets and switches, inlets/outlets and lighting, designed to reduce install time and wiring errors.

We offer a full service from design to manufacture, aftersales and warranty. Contact your account manager for details.

Green Credentials: Taking the Environment Seriously

Recycling has been rolled out throughout the factory and is fully compliant with UK Waste Electrical and Electronic Equipment (WEEE) Regulations.

ISO 14001:2015 certification for our environmental management systems. All our trucks are designed to incorporate the most fuel-efficient equipment such as streamlined side guards and roof fairings.

With over 40 years in the industry, our team provides practical advice and technical support you can rely on.

Wim Batist
Chairman

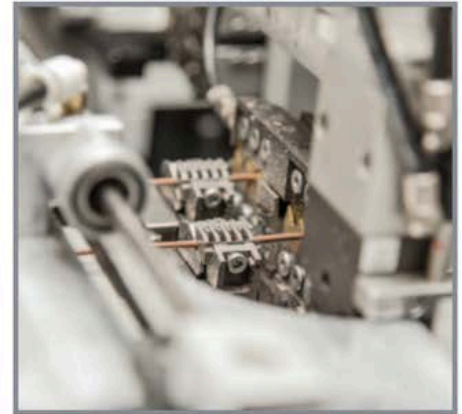

Adam Slater
Managing Director

Wayne Boyd
Sales & Marketing Director

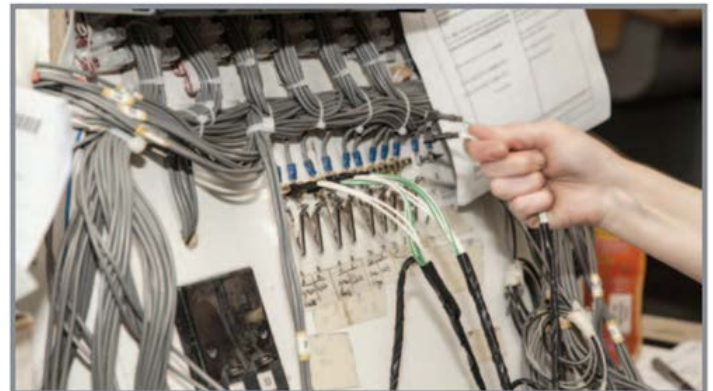

Dean Hans
Technical Sales Director

BCA Motion produce wiring systems and electrical components for the leisure and automotive industries.

We have five major production areas:

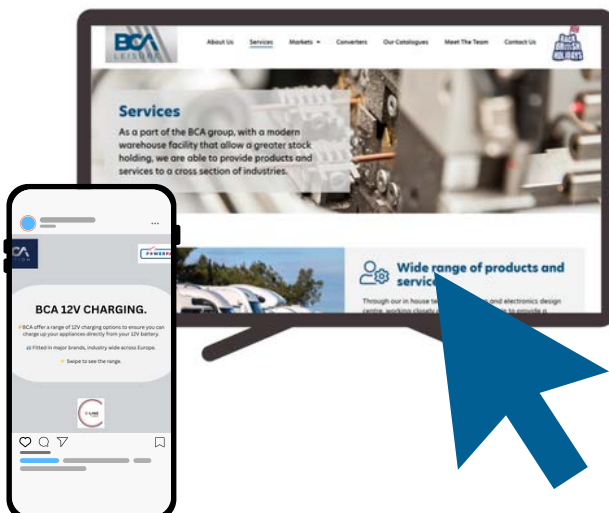

- 12V wiring harnesses
- 230V wiring harnesses
- Plastic components
- Control systems
- Aftersales support

Our modern warehouse facility allows a greater stock holding. We are able to provide products and services to a wide range of industries.

Spacious production layout giving flexibility in production schedules.

Purpose-built workstations allow greater efficiency in production.

Standards

BCA Motion is a member of the National Caravan Council and BSI.

All the products supplied are manufactured to the relevant BS-EN standards. All products carry a CE certification where applicable.

12V wiring harnesses manufactured in accordance with EN 1648-1/-2.

230V wiring harnesses manufactured in accordance with BS7671.

Battery boxes in compliance with EN 1648-1 and EN 1648-2

Power supplies designed and tested to EN 55014 (1993) and EN 60335-2-29

RCDs - IEC 61008-1, MCBs - IEC 60898-1

16A plugs and couplers - IEC/EN 60309-1/-2

230V accessories designed and tested, ensuring compliance with relevant industry and vehicle standards.

Through our in-house technical drawing and electronics design centre, working closely as a team, we are able to provide a service from inception to completion, for a full range of harness and control products.

All products are produced by a skilled and fully trained workforce and built to the exacting requirements of our customers and designed to incorporate the most effective, efficient methods and designs.

Every unit is bench tested using rigorous checking programmes, ensuring many years of reliable service.

Wiring Harness Kits

Plug-and-play system, built to suit your layout.

Wiring Harness Kits

Bespoke electrical kits for manufacturers, supplied as a complete build-ready system to reduce installation time and wiring errors. Bespoke wiring harnesses - Control panels - Power distribution - Consumer units - Chargers - Sockets and switches - Inlets - Lighting and more.

Wiring Harness

- Space taped
- Fully taped
- Cloth taped
- Conduit

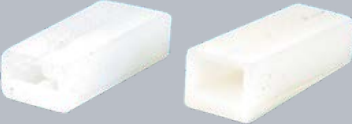

Every harness is fully tested against approved drawings using the latest technology and software, helping to reduce installation faults and speed up fitting.

We use modern harness building equipment, including advanced taping and wire cutting machinery, to ensure consistency and efficiency. All terminations are produced using calibrated crimp force technology, to ensure quality and reliability.

Connectors

Wiring Installation

Installation examples

We produce harnesses designed to make installation as straightforward as possible, based on each customer's requirements.

This can include wiring within the furniture, roof and throughout the body of the van.

Control Panels

A selection from our extensive product range. We pre-programme your control panel to suit your exact requirements

Montana

Large 7" LCD Glass Touchscreen Touchscreen Control Panel

The Montana Control Panel is a 7" LCD glass touchscreen for controlling BCA electrical systems.

4 main control buttons

Master, lights, pump and awning light
(auxiliary output).

Leisure battery and vehicle battery voltages.

Current monitors can also be added for
solar, leisure battery current and vehicle
battery current.

Water and waste tank levels.
Requires BCA water level probes.

Internal and external temperature levels.
Requires BCA temperature probes.

Customisable text allows switches to be
personalised to your requirements.

All our control panels are customisable,

PDU (Power Distribution Unit)

A range of power distribution options and sizes, allowing you to control your 12V system. Depending on your configuration, you can also charge from mains power and distribute 230V. All our systems are plug-and-play and can be customised and supplied pre-built for faster installation.

LIN Hub for digital control panel integration.

Dimensions – W: 307mm x H: 262mm x D: 93mm

Improved 20A Charger for larger batteries and faster charging, now available as an upgrade.

The compact PDU has up to 3 RCDs and MCBs which can be configured to requirements, including **Relevant Earth Neutral Bonding** where required for the safe operation of some Inverters.

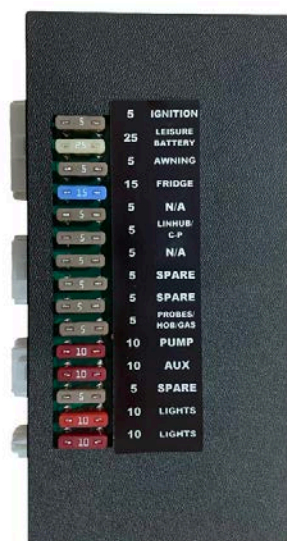

Available with three power supply options:
Without charger, 10A charger or our new **20A charger**.

NEW

The large PDU can have up to 6 RCDs and MCBs and a range of chargers. Depending on requirements, there are also several options of fuse and relay boards.

Dimensions – W: 330mm x H: 275mm x D: 180mm

Fuse and relay boxes for 12V systems.

Power Supplies

We have a range of power supplies and chargers for use either separately or with our large PDU. Designed for use on European 230V mains.

All our power supplies and chargers are compatible with lithium batteries (with built-in BMS) but do not include a dedicated or programmable lithium charging cycle.

Our lithium charger can be easily switched between a standard power supply to a dedicated lithium supply.

20A single-stage power supply.
30A single-stage power supply.
Input 230V AC. Output 13.8V DC.

20A single-stage power supply with lithium switch option.

NEW

10A power supply. Input 230V AC. Output 13.8V DC.

25A DC-DC battery charger. This unit is a high current battery charger for lead-acid leisure batteries. Its purpose is to charge leisure batteries from the vehicle charging system when the engine is running.

The unit senses D+ (vehicle charging is running) to enable its output to provide ripple-free, high-current charging of leisure batteries.

20A dual-stage power supply with separate 6A battery charger.
13.8V DC output. 13.8V - 14.2V DC battery charger.

Consumer Units

We build consumer units bespoke to your needs, including pre-wired, labelled units.

Mains Consumer Unit Standard

This unit provides maximum protection for your mains electricity system.

Deluxe Consumer Unit

Based on our experience, the consumer unit offers all the functionality of the standard unit, with options for 6A, 10A or 16A MCBs.

6A, 10A and 16A double-pole MCBs.
25A RCDs (earth leakage protection),
RCBOs and contactors.

Our 230V consumer units can be configured to your requirements and supplied pre wired, labelled and ready to install, helping to reduce wiring time on site.

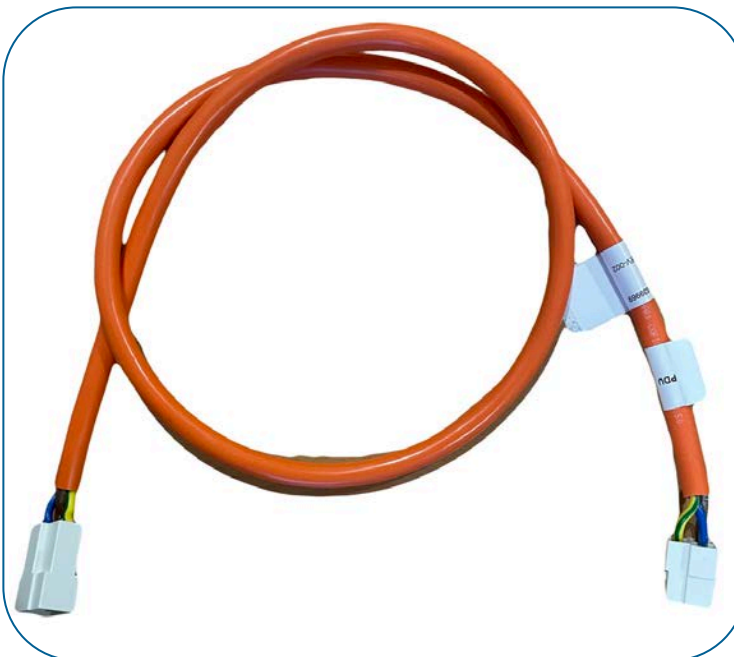

We can also provide 230V tails and harnessing for a bespoke, plug-and-play system.

230V Wiring

Much like our 12V wiring, we can also provide bespoke 230V harnesses with connectors, making installation as simple and plug-and-play as possible.
